ATAD Prevention Centre

is a part of the city of Lund. Our task is to prevent the abuse of ATAD (Alcohol, Tobacco And other Drugs) as well as dealing with crime prevention issues. Our methods comprehend monitoring appropriate - quantitative and qualitative – information, method development and education issues as well as proceeding adequate information.

Another primary task has been to establish stable structures in which policy makers, practitioners and researchers regularly meet to discuss outcomes of monitoring activities for the development and implementation of policy and practice. In dealing with these issues we have a co-ordinating group consisting of experts in the field of ATAD and crime prevention.

Our starting point is to a certain extent more health promotion than treatment, which is of significance for us in order to implement the instruments we use.

Vision

The city of Lund should be a community free from abuse and complications from alcohol, tobacco and other drugs.
